---

## PROFESSIONAL SUMMARY

Backend and full stack developer with a BEng in ICT (JAMK, 2025) and hands-on experience building RESTful APIs on AWS, test automation with Robot Framework/Selenium, and front-end development with Angular. Proven track record of delivering API infrastructure, improving software quality, and working in agile, English-speaking teams. Open to backend, full stack, QA/automation, or cloud roles — in Finland or remotely across Europe and beyond.

---

## PROFESSIONAL EXPERIENCE

### Back End Developer

Dec 2024 – Jun 2025

*MyHomesID Oy · Jyväskylä, Finland (remote & on-site)*

- Designed and built the company's entire API project from the ground up on AWS, including RESTful API design, implementation, documentation, and deployment via API Gateway.
- Established and configured AWS API Gateway for secure internal and external API consumption — the first such infrastructure at the company.
- Onboarded and trained internal staff on the API project, tooling, and best practices.
- Collaborated with cross-functional teams in an English-language, international working environment.

### Junior Test Automation Engineer

May 2023 – Jul 2023

*WIMMA Lab, JAMK University of Applied Sciences · Jyväskylä, Finland*

- Built and executed structured test automation suites using Robot Framework with Selenium, increasing test coverage across the project's web platform.
- Re-developed the WIMMA Lab 2023 website, improving UX and overall functionality.
- Maintained test documentation and reported results systematically in an agile team environment.
- Identified and resolved software defects, contributing directly to improved software reliability.

### Teaching Assistant (ICT Skills)

Sep 2022 – Nov 2022

*JAMK University of Applied Sciences · Jyväskylä, Finland*

- Delivered weekly technical classes and hands-on ICT support to students under Senior Lecturer Matti Mieskolainen.
- Evaluated student assignments and provided structured, constructive feedback.
- Commended by supervisor for excellent English skills, initiative, and professional communication.

---

## EDUCATION

### Bachelor of Engineering – Information & Communications Technology

2021 – Dec 2025

*JAMK University of Applied Sciences · Jyväskylä, Finland*

- Specialisations: Software Engineering, Cyber Security, IoT Systems, Data Analytics & AI.
- Thesis: "A Security Maturity Model for MERN Stack Applications in Bangladeshi Small and Medium-sized Enterprises".
- Electives: WIMMA Lab (287-hour professional programme), Road to Hackathon (Hackathon Finalist 2022), JAMK InnoFlash innovation programme.
